Fostering a Culture of Instructional Development in the Department of Statistics and Probability: Our Journey with First-Year Graduate Teaching Assistants

ABSTRACT:
How do we support graduate students to teach introductory statistics classes, which themselves are undergoing dramatic transformation? In this talk, we will get to engage with lessons learned and questions still unanswered as we embarked on the journey of developing an instructional mentoring program for the Department of Statistics and Probability.

BIOS:

Jennifer Green is an Associate Professor of Statistics Education in the Department of Statistics and Probability and the Program in Mathematics Education.

John Keane is a Teaching Specialist in the Department of Statistics and Probability and the Course Coordinator for STT 231: Statistics for Scientists which offers 15-25 recitation sections each semester and serves over 1500 students each AY. He is pursuing his Ph.D. in Educational Psychology and Educational Technology at MSU.dd a little bit of body text

Vince Melfi is Associate Chair and an Associate Professor in the Department of Statistics and Probability
